

# Color and You

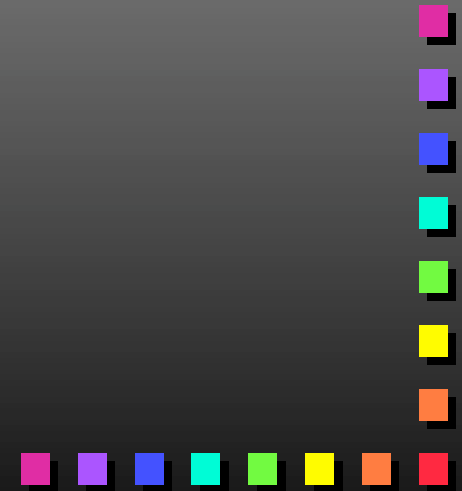

A presentation by  
Judith Sweeney  
Onion Mountain Technology, Inc.

# Red / Pink / Purple

**This is what text looks like with different color filters. Some students like a variety of filter colors in one “color family.” Others have just one**

**filter that “works.” Occasionally, someone may do best with two filters used together to produce a very specific color.**

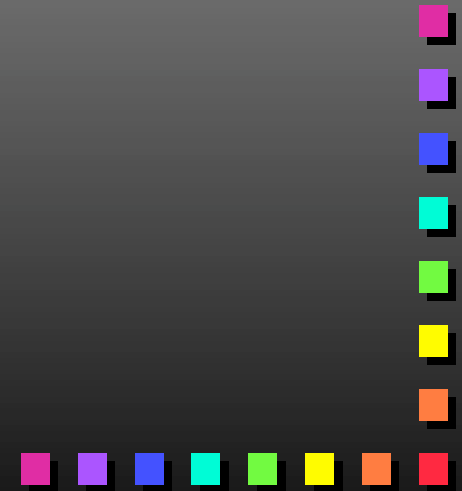

# Blue

**This is what text looks like with different color filters. Some students like a variety of filter colors in one**

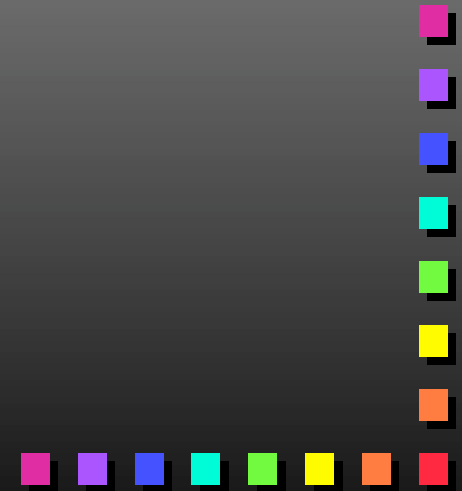

**“color family.” Others have just one filter that “works.” Occasionally,**

**someone may do best with two filters used together to produce a very specific color.**

# Green

**This is what text looks like with different color filters. Some students like a variety of filter colors in one “color family.” Others have just one filter that “works.” Occasionally, someone may do best with two filters used together to produce a very specific color.**

# Yellow / Gold / Peach

**This is what text looks like with dif-**

**ferent color filters. Some students**

**like a variety of filter colors in one**

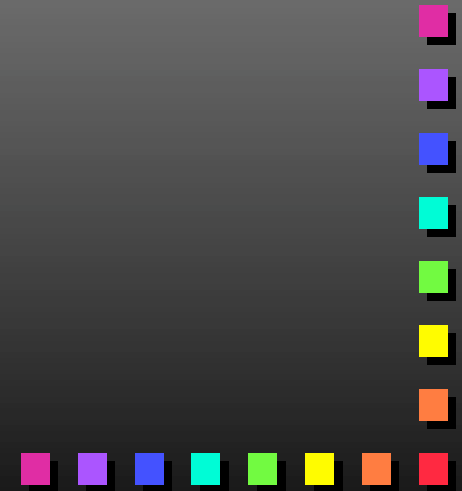

**“color family.” Others have just one**

**filter that “works.” Occasionally,**

**someone may do best with two fil-**

**ters used together to produce a very**

**specific color.**

# Smoke

**This is what text looks like with different color filters. Some students like a variety of filter colors in one “color family.” Others have just one filter that “works.” Occasionally, someone may do best with two filters used together to produce a very specific color.**
